

Oil Pastels

Objectives

- Color scheme matches content of drawing.
- One oil pastel technique (student's choice) and blending (value scale) was used throughout piece.
- Each color is mixed with similar colors to create more depth (Layering Technique)

TIPS:

- LAYER. LAYER. LAYER YOUR COLORS. Example: Your sky should not just be straight blue or your grass straight green.
- You can use many surfaces (wood, glass, & different types of paper)
- Accidentally got dark in a light area? Take a paper towel, scrub off and then layer back over with the light colors
